

Let's stop the strong political influence every branch of our government has tried to acquire over the last 10 years! It seems that everytime I turn around government is trying to tell us how to live, how to act, how to talk, etc. Before we know it, we'll be right back to where we were over 200 years ago - A strong desire to leave the oppression another form of government had on its' people.!.
Stop harassing Howard Stern! He's done nothing wrong and it's good to hear someone take stands on issues we the people want to hear. Just because a select few might be offended by his comments does NOT give you a right to take it away.

Take Oprah Winfrey away - she's more of a threat to us than Howard.

Don't take away the programming on XM radio. It's a great tool that technology and innovation has given us, yet, a few of us want to bastardize it because someone is not making enough money.

Why don't we concentrate on taking all of the PORN and SPAM off the public airwaves instead??? Leave the rest of the real information providers ALONE!!
